PRESS RELEASE

Poul Stilling, leading financial transaction solutions expert, joins Algorithmica

We are delighted to announce that Poul Stilling, leading expert within financial market data and transaction solutions for the financial services industry, joins Algorithmica as Country Manager for Algorithmica Denmark and Sales Director. With the addition of Poul Stilling, Algorithmica strengthens its ability to deliver value to its clients both in the Nordic region and globally.

Poul Stilling has a solid background and expertise from the vendor side of financial market data and trading technology, with previous positions as product- and sales specialist at Infront and Reuters. He has spent a major part of his career in the Danish financial market arena and will continue to focus on helping customers to optimize internal business processes in his new role as part of the Algorithmica team. He will be based in Copenhagen but will work globally in his role as Sales Director.

"I am proud to join Algorithmica Research. I bring nearly four decades of Danish financial market data and advanced transaction solutions experience to the business. Any company involved in financial trading is always on the lookout for efficient and cost-effective solutions to optimize its quantitative analysis and risk management routines, and to simplify and automate the demands for regulatory reporting. And this is exactly how Algorithmica Research helps its customers - with its best-of-breed products.", says **Poul Stilling**.

"I'm glad to have Poul join our team and I look forward to working together to expand our presence in the Danish market. With his previous experience and deep knowledge of the financial industry, he'll be a great addition to the Algorithmica team.", says **Niclas Holm, CEO and founder of Algorithmica**.

About Algorithmica

Algorithmica is a leading provider of efficient tools for real-time quantitative analysis, enabling our clients to improve price, trade, and risk management of financial transactions. Solutions built for speed and performance are powered by Quantlab®, the award-winning software development platform for quantitative financial analysis. In addition, Algorithmica provides products for enterprise-wide risk management and market data management including time-series data, static data, and calculated data.

Part of the FCG group and with head office in Stockholm, Sweden, customers include well-known financial institutions mainly in Northern Europe and London.
